Protection and Survivability

Add-on-Armor

General.

FALCK SCHMIDT Defence Systems (FSDS) has developed, manufactured and supported several add-on-armor systems i.e. for the LAV/PIRANHA III and the fire support vehicle PNMK M/92.

FSDS continues development in order to optimize the solutions in respect of especially the adaptability, weight, cost, and the overall protection - in terms of minimizing the ballistic windows.

Armor and Add-on-armor systems from FALCK SCHMIDT Defence Systems (FSDS) are characterized by:

- Additional ballistic protection of mobile and/or fixed installation
- Ballistic protection as defined by the user
- Modular built up
- Easy to mount
- Easy to dismount
- Damaged parts easily replaced
- To be used under all climatic conditions
- Low weight
- Necessary test and documentation
- NATO STANAG 4659 compatible

ISO 9001:2000 - AQAP 2110
approved Quality Management System
